

AIR SUSPENSION

Dunlop air assist kits are specially developed for delivery vans, pick-up trucks and camper vans with fixed axle loads.

For decades DSC Nederland has been manufacturing Dunlop air suspension for motorhomes, van's and pick-ups. We have a wide range of air assist products in stock, depending on make and model. Air suspension is still unknown to many and therefore unloved. Whoever has experienced the benefits of air suspension, never really wants to be without it. Every air assist kit consists of specially designed strong steel fasteners and large, strong air bellows that can be operated independently. You can determine the comfort, stability and ride height by varying the air pressure yourself.

WITH AIR SUSPENSION

- » Considerable increase in stability
- » Reduced sensitivity to side winds
- » Significantly improved road holding
- » Maintenance of the correct braking pressure
- » Less wear and tear on tires
- » Always the correct driving height
- » Prevent any damage by traveling by Ferry
- » The possibility of leveling left/right independant

WITHOUT AIR SUSPENSION

- » Steering becoming poor and unresponsive
- » Diminished road holding
- » Lengthening braking distance
- » Incorrect headlamp alignment, causing dazzle to oncoming vehicles
- » Reduced driving stability and comfort

Smooth suspension by using large air bellows

Air suspension is also available for vehicles with an AL-KO chassis

AIR SUSPENSION

Option packages available for your air suspension:

Option valves

- Valve bracket
- 2 Inflate valves
- 5 m air hose blue, 5 m air hose black

Option mano

- 2 Manometers
- 2 Inflate valves
- 10 m air hose blue, 10 m air hose black

Option 1*

- 2 Manometers
- 2 Inflate valves
- Built-in panel
- 10 m air hose blue, 10 m air hose black

Option 2*

- Dunlop compressor 12V
- 2 Manometers
- 2 Deflate valves
- Operation switch
- Built-in panel
- 10 m air hose blue, 10 m air hose black

Option 3*

- Dunlop compressor 12V
- 2 Manometers
- 2 Deflate buttons
- 2 Inflate buttons
- Built-in panel
- Air pressure tank
- 10 m air hose blue, 10 m air hose black, 10 m air hose green

*For many vehicles we can supply a specially fitting dashboard panel for the operation of the air suspension.
